

# Your equipment deserves the best

## INDUSTRIAL

### CERAMIC HYBRID COMPOSITE

Engineered for outstanding chemical, abrasion, and UV resistance, System X Industrial™ ceramic hybrid composite offers an impressive five-year lifespan, helping you cut maintenance costs and focus on what truly matters most.

## GLASS+

### CERAMIC GLASS COATING

System X Glass+™ coating protects your windshield, windscreen, windows, mirrors, glass headlamps, and other glass surfaces from micro-scratches while multiplying the surface's hydrophobic properties for two full years. System X Glass+™ keeps surfaces cleaner and clearer while improving driver visibility.

## LVP

### CERAMIC NANO COATING

System X LVP™ utilizes advanced flexible nanotechnology to provide warrantied protection against common spills and stains on leather, vinyl, and plastic surfaces. System X LVP™ preserves your interior's natural look and feel.

### Protection Against Harmful Corrosives

Proven in over 5,000 hours of salt spray testing with no signs of corrosion, System X® Industrial ensures long-lasting protection in the harshest conditions.

### Exceptional Abrasion Resistance

System X® Industrial delivers exceptional abrasion resistance, protecting surfaces from mechanical wear, scuffing, and micro-scratches caused by daily industrial use.

### UV Ray Protection

Incorporating advanced UV-blocking technology, System X® Industrial shields surfaces from ultraviolet radiation, preventing oxidation, fading, and surface degradation over time.

### Outstanding Chemical Resistance

Engineered to shield against harsh chemicals, including acids, solvents, and alkalis, System X® Industrial prevents chemical etching, staining, and degradation, preserving surface integrity in corrosive industrial environments.
